## About Me

Cybersecurity Analyst (SOC & GRC) with 6+ years of experience in IT operations, L3 support and production incident management, now focused on defensive security (Blue Team) and risk management. I combine a technical-troubleshooting background with day-to-day security operations and compliance frameworks (ISO 27001, ENS).

**SOC & Blue Team Operations:** incident response, alert triage, threat detection, log investigation and root cause analysis.
**GRC & Risk Management:** IT risk assessment, control auditing, ISO 27001 and ENS framework alignment.
**IT Operations:** L2/L3 application troubleshooting, priority-based incident management, system monitoring and debugging.

My experience in real production systems lets me evaluate risk and investigate security alerts from a realistic, operational perspective rather than a purely theoretical one. **Target roles:** SOC Analyst, Incident Response Analyst, GRC Analyst, SecOps.

## Professional Experience

**Junior Cyber Security Analyst**
**Seccion9** Barcelona, Spain
Sep. 2026 – Present
- Executed active reconnaissance, OSINT and vulnerability scanning in sandbox environments.
- Operated the T-Pot honeypot framework to capture internal threat telemetry and correlate attack vectors using the ELK Stack and Kibana dashboards.
- Managed end-to-end External Attack Surface Management (EASM) audits via Aion, driving the client lifecycle from Rules of Engagement (RoE) to executive reporting.
- Correlated threat telemetry with the Blue Team across SIEM and NIDS platforms (Wazuh, Suricata, Zeek) to assess vulnerability impact and eliminate detection blind spots.
- Automated post-audit Linux server hardening and vulnerability remediation by authoring modular, idempotent Ansible playbooks and shell scripts.

**Senior Technical Support Engineer**
**Glovo - Delivery Hero** Barcelona, Spain
Feb. 2025 – Jun. 2026
- Correlated AWS CloudTrail audit logs and SIEM security dashboards in Datadog to identify unauthorized access attempts, brute-force indicators, API spikes and anomalous geographical logins.
- Triaged security alerts, phishing reports and Indicators of Compromise (IOCs), reporting and escalating to L2 teams.
- Administered user access (IAM) requests and RBAC role assignments in Okta to enforce Least Privilege (PoLP).
- Analysed system logs, APM traces and API payloads using Postman for Root Cause Analysis (RCA) on production issues.
- Investigated B2B/B2C failures across Web, Android and iOS, running SQL queries in DataGrip to report bugs.
- Managed L3 incident escalations, coordinating cross-functional response workflows with SRE & Ops teams.
- Automated incident and reporting escalation paths, custom SLAs and dashboards using Jira Automation.
- Documented technical post-mortems and KB articles in Confluence to lower escalation rates.

**Technical Support Engineer**
**Glovo - Delivery Hero** Barcelona, Spain
Sep. 2020 – Feb. 2024
- Isolated B2B/B2C bugs in Jira via SQL and Datadog based on economic impact and SLOs.
- Raised quality-driven bug reports to software teams in an Agile environment with continuous testing.
- Monitored system health and detected anomalies using Grafana and Datadog dashboards.
- Analysed complex failures across APIs, Web and Mobile with Instabug and Chrome DevTools.
- Managed API operations with Postman, from technical onboarding and webhooks to authentication.
- Executed complex SQL queries in DataGrip to resolve production inconsistencies and data requests.
- Wrote technical KB articles in Confluence to reduce L3 escalation rates by empowering L1/L2 teams.

**Junior Java/Python Developer – Tech Support (Google Cloud Platform)**
**Webhelp** Barcelona, Spain
Jan. 2020 – Jul. 2020
- Provided technical support for Google Cloud Platform (GCP), resolving complex issues via ticketing.
- Specialised in data migrations, supporting full-cycle pipeline execution and debugging.

- Engaged in software development tasks – coding, testing and debugging in Java and Python.
- Collaborated with teams using Git to ensure code quality and reliability.

**Experiencia adicional previa**

- **Barcelona Activa** – Junior Backend Developer (Sep. 2019 – Jan. 2020): APIs en Java/Spring, MySQL/MongoDB, JWT.
- **Universitat de Barcelona** – Web Support Technician (Jun. 2018 – Jun. 2019).
- **Ayuntamiento de Viladecans** – IT Support Technician (Oct. 2017 – Apr. 2018).
- **Hospital del Mar - Parc de Salut MAR** – IT Help Desk Specialist (Feb. 2015 – Jun. 2016): soporte IT y control de accesos en entorno clínico.

## Cybersecurity Projects

**Security Operations & Incident Response Projects**

- Investigated simulated security incidents using SOC workflows, SIEM platforms and incident response methodologies.
- Analysed security events, logs and indicators of compromise.
- Applied MITRE ATT&CK techniques to classify attacker behaviour and document findings.

**Web Application Security Assessment**

- Performed vulnerability assessments, reconnaissance, enumeration and security testing.
- Analysed vulnerabilities, CVEs and security weaknesses, producing remediation recommendations.

**Cybersecurity Risk Assessment**

- Performed asset identification, dependency analysis and business impact assessments using MAGERIT v3 and ENS principles.

## Education

**Professional Certificate in Information Security (IFCT0109)**
Ironhack – Computer and Information Systems Security / Information Assurance
May 2026 – Dec. 2026

**Higher Education Diploma in Cross-Platform Application Development**
Universitat Oberta de Catalunya (UOC) – Computer Software Engineering
Sep. 2016 – Jun. 2018

**Java Backend Specialization**
IT Academy de Barcelona Activa – Computer Software Engineering
Sep. 2019 – Jan. 2020

## Certifications

CompTIA Security+ – In Progress
Microsoft SC-200 Security Operations Analyst – In Progress
TryHackMe Cybersecurity Learning Paths – In Progress

## Technical Skills

**Security Operations:** Incident Response, Alert Triage, Log Analysis, Threat Detection, Threat Hunting Fundamentals, Vulnerability Management, MITRE ATT&CK, EASM.

**SIEM, NIDS & Monitoring:** Wazuh, Suricata, Zeek, Splunk, Elastic Stack (ELK), Kibana, Microsoft Sentinel, Sysmon, Datadog, Grafana, T-Pot (honeypot).

**IAM & Cloud:** Okta (IAM/RBAC, PoLP), AWS CloudTrail, modelo de responsabilidad compartida cloud.

**Security Tools:** Wireshark, Nmap, Burp Suite, OWASP ZAP, Metasploit, OpenVAS, WPScan, Kali Linux.

**Automatización & IaC:** Ansible (playbooks idempotentes), Bash scripting.

**Técnico:** Windows, Linux, Python, Bash, SQL, REST APIs, HTTP/S, DNS, TCP/IP, Git, Postman, Jira, Confluence.
