SUMMARY

Security Operations Analyst with 6+ years of experience in IT operations, production incident management & response, and troubleshooting complex application environments. Experienced in system monitoring, log investigation, alert investigation and root cause analysis across distributed systems. Specialising in defensive cybersecurity operations.

EXPERIENCE

Junior Cyber Security Analyst

Seccion9 - Barcelona, Spain | September 2026 - Part-time

- Executed active reconnaissance, **OSINT**, and **vulnerability scanning** in sandbox environments.
- Operated the T-Pot **honeypot** framework to capture internal threat telemetry and correlate attack vectors using the **ELK** Stack and **Kibana** dashboards.
- Managed end-to-end external **attack surface** management (EASM) audits via Aion, driving the client lifecycle from Rules of Engagement (**RoE**) to executive reporting.
- **Correlated** threat telemetry with the Blue Team across **SIEM** and **NIDS** platforms (**Wazuh**, Suricata, Zeek) to assess vulnerability **impact** and eliminate detection blind spots.
- Automated post-audit **Linux** server hardening and vulnerability remediation by authoring modular, idempotent **Ansible** playbooks and **shell scripts**.

Senior Technical Support Engineer (L3/SRE)

Glovo - Delivery Hero Barcelona, Spain | September 2020 - June 2026

- Correlated **AWS CloudTrail** audit logs and **SIEM** security dashboards in Datadog to identify **unauthorized access attempts**, brute-force indicators, API **spikes**, and anomalous geographical logins.
- Triaged security alerts, **phishing** reports and Indicators of Compromise (**IOCs**), reporting & escalating to L2 teams.
- Administered user access (**IAM**) requests and **RBAC** role assignments in **Okta** to enforce **Least Privilege** (PoLP).
- Analysed system **logs**, APM traces, and API **payloads** using **Postman** for Root Cause Analysis (**RCA**) on production issues.
- Investigated B2B/B2C failures across Web, Android, and iOS, running SQL queries in DataGrip to **report** bugs.
- Managed L3 **incident escalations**, coordinating cross-functional response **workflows** with SRE & Ops teams.
- **Automated** incident & reporting escalation paths, custom SLAs, and dashboards using **Jira** Automation.
- Documented technical post-mortems and KB articles in **Confluence** to lower escalation rates.

EDUCATION

IFCT0109 - Cybersecurity Professional Certificate - 2026

SEPE Official Professional Certificate | Delivered by Ironhack

CompTia security + SY0-701 Certification - 2026

In progress

Higher Education Diploma in Cross-Platform Application Development - 2018

Universitat Oberta de Catalunya (UOC) – Open University of Catalonia

CORE SKILLS

Security Operations & SOC: SIEM (Datadog Cloud Security, ELK Stack), Threat Detection, Incident Response, Log Analysis (AWS CloudTrail), IOC Analysis, Vulnerability Management (Nmap, Nuclei).

Identity & Access Management (IAM): Okta, Entra ID (Active Directory), RBAC, Least Privilege (PoLP), Access Governance.

Infrastructure, Cloud & Systems: AWS (EC2, S3, IAM, WAF), Linux/Unix Administration, Server Hardening, Docker, Ansible (IaC).

Observability, Operations & API: Datadog, Grafana, Postman, REST APIs, SQL (DataGrip), Chrome DevTools, Instabug.

Process & Tooling: Jira Service Management (Automation, SLA), Confluence, Agile/Scrum, Git, Python, Bash Scripting.
