About Me

Senior Technical Support Engineer (L3/SRE) with nearly 6 years of experience supporting production environments, investigating complex incidents and troubleshooting distributed systems.

Experienced in monitoring, log analysis, API troubleshooting and incident management using tools such as Datadog, Grafana, SQL and Postman.

Currently specialising in Cybersecurity and Security Operations, with hands-on experience in SIEM monitoring, incident response, threat detection and defensive security methodologies.

Professional Experience

Senior Technical Support Engineer (L3 / SRE)

Glovo - Delivery Hero

Barcelona, Spain

Sep. 2020 – Jun. 2026

- Managed production incidents across customer, courier and partner platforms in a large-scale distributed environment, following incident lifecycle processes from detection to resolution.
- Monitored system health and service reliability using Datadog and Grafana dashboards, identifying anomalies, degradation and operational issues.
- Analysed logs, metrics and application behaviour to perform troubleshooting and root cause analysis across distributed services.
- Investigated API, authentication and integration issues using Postman, SQL queries and debugging tools.
- Executed advanced SQL analysis to investigate production incidents, validate data consistency and support technical investigations.
- Led L3 escalations and technical investigations, collaborating with Engineering teams during critical incidents and RCA processes.
- Improved monitoring and alerting processes by analysing alert behaviour and reducing operational noise.
- Created technical documentation and knowledge resources to improve operational response and incident resolution.

Junior Cloud Support Developer (GCP)

Webhelp

Barcelona, Spain

Jan. 2020 – Aug. 2020

- Provided technical support for Google Cloud Platform environments, troubleshooting infrastructure and application issues.
- Supported data migration workflows, debugging pipeline failures and analysing technical errors.
- Developed and debugged applications using Java and Python, collaborating through Git workflows.

Cybersecurity Projects

Security Operations & Incident Response Projects

- Investigated simulated security incidents using SOC workflows, SIEM platforms and incident response methodologies.
- Analysed security events, logs and indicators of compromise.
- Applied MITRE ATT&CK techniques to classify attacker behaviour and document findings.

Web Application Security Assessment

- Performed vulnerability assessments, reconnaissance, enumeration and security testing.
- Analysed vulnerabilities, CVEs and security weaknesses, producing remediation recommendations.

Cybersecurity Risk Assessment

- Performed asset identification, dependency analysis and business impact assessments using MAGERIT v3 and ENS principles.

Education

Professional Certificate in Cybersecurity (IFCT0109)

Ironhack Cybersecurity Program – SOC Analyst & Security Operations Training
2026

Associate Degree in Web and Multiplatform Development

Universitat Oberta de Catalunya (UOC)

Certifications

CompTIA Security+ – In Progress

Microsoft SC-200 Security Operations Analyst – In Progress

TryHackMe Cybersecurity Learning Paths – In Progress

Technical Skills

Security Operations: Incident Response, Alert Triage, Log Analysis, Threat Detection, Threat Hunting Fundamentals, Vulnerability Management, MITRE ATT&CK.

SIEM & Monitoring: Splunk, Elastic Stack, Kibana, Microsoft Sentinel, Sysmon, Datadog, Grafana.

Security Tools: Wireshark, Nmap, Burp Suite, OWASP ZAP, Metasploit, OpenVAS, WPScan, Kali Linux.

Technical: Windows, Linux, Python, Bash, SQL, REST APIs, HTTP/S, DNS, TCP/IP, Git.

Languages

Spanish: Native — Catalan: Native — English: B2 Professional Working Proficiency
